Product Manager (Transitioning) | Ex-Project Lead | Embedded Systems Specialist

Results-driven professional with 7+ years of technical experience in embedded systems, transitioning into product management. Experienced in contributing to B2B SaaS environments through feature planning, backlog grooming, and customer feedback cycles. Proven expertise in cross-functional collaboration, stakeholder alignment, and feature delivery. Strong foundation in Agile methodologies, user story creation, and backlog management. Currently pursuing Product Management Certification from IIM Ranchi to reinforce product strategy, customer insights, and roadmap execution.

Core Competencies & Tools:

Product Skills: Product Roadmapping | User Stories & Acceptance Criteria | Agile/Scrum | Prioritization (RICE, MoSCoW) | Feature Definition | Stakeholder Management

Tools: Jira | Confluence | Google Analytics | Figma | Typeform | Miro | Excel | PowerPoint

Product Management Experience:

Robert Bosch Engineering & Business Solutions (BGSW)

Product Management Transition Role

Aug 2023 – Present

- Defined and prioritized features aligned to product goals in collaboration with engineering and customer teams.
- Established and maintained a well-groomed product backlog consisting of 150+ user stories; ensured clear prioritization and alignment with overall product roadmap.
- Participated in roadmap discussions, structured usability feedback sessions, and analyzed feedback via Typeform.

Prior Technical Roles:

Project Lead, Senior & Associate Engineer

Aug 2017 – July 2023

- Delivered RTOS and CUBAS software stacks across product lines, mentored engineers, and led feature deliveries.
- Bridged business and tech for timeline adherence, quality assurance, and change management.
- Built solutions in AUTOSAR and embedded C with successful component integration and testing.
